General note:

Data extracted via Garton which collects information on availability of pumping appliances for Devon & Somerset Fire & Rescue. Availability is based crewing only and does not include any unavailability due to mechanical defects.
 Availability per month is calculated based on the number of hours available in any given month divided by the total number of hours in the given calendar month. I.E. Pump A is available for 700 hours in April 2019 would equate to: $700 / (24 \text{ hours} * 30 \text{ days}) \rightarrow 700 / 720 = 0.972$ or 97.2%
 Availability per financial year is calculated using the same method as calculating the monthly percentage. Albeit the total available hours in the year divided by the total number of hours in the given financial year.
